Case has always made a good loader backhoe. The 580l was a solid machine, and theres still lots of them out working. The most common problem in them was the transmission shuttle snap ring breaking (in the transmission control valve) An easy fix, just annoying (theres also and updated snap ring if it breaks).

I worked for Case I-H when the Magnum came out (1986), and other than a few minor problems (front Cover leaks, occasional Turbo problem) we had very little problem with them, however in the Magnums we ran the 8.3 litre engine, and the 5.9 was used in the Maxxum Tractors and others (lower horsepower)-by the way, we had one of the first 7150's (rated @195 h.p, if memroy serves, and it pulled 232 ...

Case IH Magnum (Cummins) Engines - Page 2

Problems in this area will cause diesel engine starting problems, uneven running and white smoke when the engine is cold. Insufficient fuel supply This speaks for itself- not enough fuel in the tank or a problem with supply pipes being cracked, bent, collapsed, restricted or some kind of restriction in the tank.

In the case of the throttle body (and related sensor), when this happens it causes false information to be relayed to the car's computer, resulting in faulty corrections to the air-fuel mixture. You may notice a switch into "limp-home" mode, where power to the car's engine power is reduced and throttle operation is limited.

EJ20 Problems and Reliability. 1. Knocking noise from EJ20 Engine. The engine has a problem in the 4th cylinder. This cylinder is hottest; the cooling is worse in this place of the engine. In this case, the piston or rod starts knocking then the engine is cold at first and all time after some period. That requires an engine rebuild. 2. Oil leaks.
