Structural Design: From the Power Tower to the ISS . In his 2016 book International Space Station: Architecture Beyond Earth, architect David Nixon details the earliest designs cooked up by a Johnson Space Center study group around 1983. Concepts such as the Delta, a cluster of modules connected to the bottom edge of a massive triangular prismatic truss structure, and the "Big T," which featured modules along the edge of another rectangular mast structure that hung from a large crossbar ...

This Is Why The Soviet Union Lost 'The Space Race' To The USA

The Space program of the Union of Soviet Socialist Republics, commonly known as the Soviet space program, was the national space program of the Union of Soviet Socialist Republics, active from the 1930s until the state's collapse in 1991. The Soviet Union's space program was mainly based on the cosmonautic exploration of space and the development of the expendable launch vehicles, which had been split between many design bureaus competing against each other. Over its 60-years of history, the Sov

Soviet space program - Wikipedia

Although US and Soviet designs for rockets for space launch applications started from essentially the same point (the German Aggregate rockets) they diverged fairly radically in basic design principles, based upon the available manufacturing and materials technology, concept of operations through launch flow, prior experience and data, and in no small part the prejudices and preconceptions of the dominant personalities for each development.

What were important differences between Soviet and ...

Soyuz is a series of spacecraft designed for the Soviet space program by the Korolev Design Bureau in the 1960s that remains in service today, having made more than 140 flights. The Soyuz succeeded the Voskhod spacecraft and was originally built as part of the Soviet crewed lunar programs. The Soyuz spacecraft is launched on a Soyuz rocket, the most reliable launch vehicle in the world to date. The Soyuz rocket design is based on the Vostok launcher, which in turn was based on the 8K74 or R-7A S

The Space Race was a 20th-century competition between two Cold War rivals, the Soviet Union (USSR) and the United States (US), to achieve firsts in spaceflight capability. It had its origins in the ballistic missile-based nuclear arms race between the two nations following World War II. The technological advantage required to rapidly achieve spaceflight milestones was seen as necessary for ...
