Linear algebra moves steadily to  $n$  vectors in  $m$ -dimensional space.

We still want combinations of the columns (in the column space). We still get  $m$  equations to produce  $b$  (one for each row).

Those equations may or may not have a

# Read PDF Linear Algebra With Applications 4th Edition

solution. They always have a least-squares solution. The interplay of columns and rows is the heart of linear algebra.
