After Alexander's death, the rule of Egypt was taken up by one of his companions, Ptolemy Soter (reigned circa 323–282 B.C.E.). Cleopatra VII Philopator (reigned 51–30 B.C.E.) was the last of the Ptolemy line. She ascended the throne along with her brother, Ptolemy XIII, but was forced out of Egypt by ministers loyal to her brother.

In mathematics, the Euclidean distance between two points in Euclidean space is the length of a line segment between the two points. It can be calculated from the Cartesian coordinates of the points using the Pythagorean theorem, therefore occasionally being called the Pythagorean distance. These names come from the ancient Greek mathematicians Euclid and Pythagoras, although Euclid did not ...
