Dr. Andrea Goldsmith is a member of the Marconi Society Board of Directors and The Stephen Harris Professor in the School of Engineering at Stanford University. Dr. Goldsmith's research is focused on the design, analysis, and fundamental performance limits of wireless systems and networks, as well as the application of communications and ...

Andrea Goldsmith - Marconi Society

The vision of wireless communications supporting information exchange between people or devices is the communications frontier of the next century. This vision will allow people to operate a virtual office anywhere in the world using a small handheld device - with seamless telephone, modem, fax, and computer communications.

WIRELESS COMMUNICATIONS

A leader in the fields of information theory and communications, Goldsmith helped lay the mathematical foundations for increasing the capacity, speed and range of wireless systems, and among her 29 patents are many inventions central to cell phone and Wi-Fi networks.

Andrea Goldsmith is the Stephen Harris professor in the School of Engineering and professor of Electrical Engineering at Stanford University. Her research interests are in information theory, communication theory, and signal processing, and their application to wireless communications, interconnected systems, and neuroscience.

Andrea Goldsmith's Profile | Stanford Profiles

Goldsmith has written several books, including "Wireless Communications," "MIMO Wireless Communications" (referring to multiple-inputs, multiple-outputs systems) and "Principles of Cognitive Radio." In addition to wireless communications, her ongoing work focuses on cyberphysical systems and a range of signal-processing problems in neuroscience.
